

about Cole.

nice to meet you!

Cole was diagnosed with an aggressive form of Ewings sarcoma, and multiple other cancers, which took his life in 6 short weeks.

Cole lived a life filled with love, fun and activities. He ran through life never a stone's throw away from his

mother, finding the best in each day. He was often found smelling the beautiful flowers in his mother's garden,

a powerful and symbolic gesture.

"Stop and smell the flowers" is a saying, we have all heard; a phrase

representative of slowing down in life and really being a part of it, in the present moment.
